Amended: April 30, 2012

I. Introduction

The Louisiana Department of Environmental Quality's (LDEQ) Intended Use Plan (IUP) for the Clean Water State Revolving Fund (CWSRF) is prepared in accordance with the provisions of Title VI of the Clean Water Act of 1987, and the Federal Fiscal Year (FFY) 2011 Appropriations Act, which was signed into law on April 15, 2011. This IUP is a required part of the process to request the Capitalization Grants, which will be matched with 20 percent in state matching funds. The FFY2011 capitalization grant allotment for LDEQ is \$16,233,000 requiring \$3,246,600 in state matching funds and the FFY12 capitalization grant allotment is \$15,537,000 requiring \$3,107,400 in state matching funds. This IUP describes LDEQ's intended uses for all funds available in the CWSRF program for State Fiscal Year (SFY) 2012, including the projects that LDEQ expects to provide financial assistance to in SFY 2012 and an overview of how the state will comply with federally mandated requirements.

The CWSRF program was established pursuant to Title VI of the Clean Water Act, as amended in 1987 (the Act). The CWSRF program presently operates under R.S. 30:2301-2306 (Act 296 of the 2010 Regular Session of the Louisiana Legislature). These statutes establish a state revolving loan fund capitalized by federal grants (Capitalization Grants for Clean Water State Revolving Funds, CFDA 66.458), by state funds when required or available, and by any other funds generated by the operation of the clean water revolving loan fund. LDEQ is authorized to engage in activities regarding the sums on deposit in, credited to, or to be received by the state revolving loan fund. The Financial Services Division and Business, Community Outreach & Incentives Division within LDEQ are responsible for the operations of the CWSRF program in the State of Louisiana. These divisions within LDEQ provide assistance to municipalities in developing, financing, and implementing wastewater treatment management plans and plants. Engineering oversight, design review, and inspection services as well as environmental assessment services are provided by the Business, Community Outreach and Incentives Division and grant management, program administration, and financial services are provided by the Financial Services Division on eligible wastewater treatment projects. All efforts are directed toward improving water quality by assisting communities in providing wastewater treatment processes that meet established effluent limits and achieve the goals of the Clean Water Act.

Since the program's authorization, LDEQ has awarded over \$631,112,274 in assistance to over 100 borrowers in 176 loan agreements, including projects funded by the American Recovery and Reinvestment Act as well as small and large municipalities. In SFY2012, LDEQ expects to fund \$126 million in high-priority water quality projects.

How the CWSRF Program Operates

Every year since the inception of the CWSRF program, the federal government has appropriated funds for the CWSRF. These capitalization grants are distributed to states using a formula outlined in the Clean Water Act Amendments of 1988. Since 1989, the LDEQ has received \$334,891,523 in federal capitalization grants. In addition, as required by the legislation, the state

of LDEQ has provided matching funds of over \$67,511,770 which is at least 20 percent of the capitalization grants.

American Recovery and Reinvestment Act

In SFY 2010, LDEQ received additional capitalization of \$43,081,400 through the American Recovery and Reinvestment Act of 2009 (ARRA), the federal stimulus bill. Fifty-three (53) additional projects received 100% principal forgiveness through ARRA. Forty-one projects have completed construction as of December 31, 2011. The remaining projects are expected to complete construction by December 31, 2012.

II. State Fiscal Year 2012 Project Funding

LDEQ's FFY2011 capitalization grant is \$16,233,000 and the FFY2012 capitalization grant is \$15,537,000. Congress mandated that at least 20 percent of the FFY2011 grant (at least \$3,246,600) and at least 10% of the FFY2012 grant (at least \$1,553,700) be put towards projects that qualify under the Green Project Reserve. In addition, the Appropriations Acts require that not less than 30 percent of the national CWSRF appropriation over \$1 billion be provided as additional subsidy. For LDEQ, between \$1,504,246 and \$5,014,152 from the FFY2011 grant and between \$863,490 and \$1,295,235 from the FFY2012 grant is required to be put towards providing an additional subsidy to borrowers; LDEQ plans to provide \$5,742,500 in subsidy as principal forgiveness. Further, CWSRF projects funded in SFY2012, regardless of funding source, must pay their workers the federal Davis-Bacon wage rates for their job classification. In SFY2012, LDEQ expects to finance 27 wastewater and stormwater infrastructure and nonpoint source projects for at \$122,391,200. These include:

- Six (6) projects in the amount of \$5,742,500 that will receive principal forgiveness. These projects are either characterized as "fix it first" projects, take place in communities that could not otherwise afford financing, or will fund green project reserve
- Four (4) projects in the amount of \$3,620,000 are currently expected to qualify for the Green Project Reserve which is equal to the required FFY2011 appropriation requirement. Additional projects in an amount equal to at least \$1,553,700 to fulfill the required FFY2012 appropriation will be determined at a later date and this IUP will be amended to identify those projects.

Figure 1 includes LDEQ's project funding list, or fundable list. These are the projects that LDEQ expects to fund in SFY2012. An expanded Project Priority List can be found in Appendix A. Project ranking criteria can be found in Appendix D.

Figure 1: List of Projects to be Funded, SFY2012								Additional Subsidy			Green Project Reserve			
Rank	Recipient	LPDES Permit number	Category	Project Description	Total Assistance	Interest Rate	Term	Principal Forgiveness Amount	Sustainability Policy	Disadvantaged Community	Amount	Category 2	Business Case Project?	Estimated Binding Commitment date
16	Alexandria (Rapides)	LA0041009	I IIIA IIIB IVB	Improve treatment capability by repairing and upgrading city-wide waste water treatment plant. This includes baffle wall replacement in each secondary pond, upgrades to improve efficiency in 2 clarifiers, and replacement of the influent flow meter and vault. Additionally, improve system management capability by upgrading SCADA equipment (city-wide).	\$ 4,550,000	0.95%	20							6/31/12
13	Ascension Parish	numerous	I IIIB	Collection system installation and wastewater treatment plant construction, including administration building and sludge handling facility.	\$ 18,000,000	0.95%	20							6/31/12
17	Blanchard (Caddo)	LA0038903	I II IIIA IIIB IVA IVB	The Town proposes to replace approximately 24,700 linear feet of existing 8" force main with new 12" diameter force main from Williams Street Station to the wastewater treatment plant; replace the Williams Street Lift station, the Hwy. 173 Lift Station and the Trey Ridge Lift Station. Additionally, the Town proposes to abandon the Magnolia woods Lift Station; install approximately 1,000 L.F. of 8" PVC gravity sewer main from the Magnolia Woods Lift Station to the fairway View Lift Station, and make improvements to the Fairway View Lift Station. The Town also proposes to replace 8000 L.F. of existing 8" PVC gravity sewer main with 10" diameter sewer main from Avondale to Hwy. 173 Lift Station and to waterproof approximately 107 existing sanitary sewer manholes.	\$ 1,600,000	0.95%	20							6/31/12
14	Bossier Parish S.D. 1 Edwards Subdv	New Plant	II IVB	There will be three collection system improvement contracts in the eastern part of Bossier Parish along the US Highway 80 corridor extending to LA 157, associated with Phase 1. The Phase 2 project consists of constructing a force main from the Phase 1 project to a new sewer treatment facility to be located on Red River and an associated collection system to provide services in central Bossier Parish.	\$ 17,750,000	0.95%	20							6/31/12
5	Bossier Parish S.D. 1 Phase I-III	LA0102890	IVA	This project will consist of the construction of approximately 1,800 linear feet (Lf) of 8" gravity sewer main, a sewer lift station, and 4,000 LF of 4" sewer force main in north central Bossier Parish near the intersection of Linton road and Palmetto Road. The proposed improvements will collect untreated wastewater flows from approximately 25 residences and businesses in the area of edwards subdivision and will convey the flows to the existing Palmetto WWTP (Town of Benton) located approximately 0.5 miles north of the subdivision. All proposed improvements will be constructed within the existing highway right-of-ways or existing utilities servitudes.	\$ 286,500	0.00%	n/a	\$ 286,500		\$ 286,500				6/31/12
18	Broussard (Lafayette)	LA0020613	I	The proposed project consists of construction of a new treatment pond with an influent and effluent system for processing sewage flows from the City of Broussard collection system.	\$ 4,000,000	0.95%	20							6/31/12
19	Crowley (Acadia) 2	LA0041254	II	The project will consist of increasing rock thickness in both of the existing rock filters. Additional filter aggregate layer thickness will be provided to reduce or eliminate flooded areas. Additionally, erosion protection (rip-rap) will be installed around the perimeter of the primary pond levee. This construction will also require repair of the riding surfaces around the primary pond.	\$ 2,700,000	0.95%	20							6/31/12
24	Grambling (Lincoln) 5	LA0038822	I II IIIB	Project includes purchase and installation of alternate aeration equipment and renovations to headwork equipment. Additional renovations to the climber screen, grit removal equipment, lift station control, post aeration compressor and dechlorination unit.	\$ 536,700	0.95%	20							6/31/12

Rank	Recipient	LPDES Permit number	Category	Project Description	Total Assistance	Interest Rate	Term	Principal Forgiveness Amount	Sustainability Policy	Disadvantaged Community	Amount	Category 2	Business Case Project?	Estimated Binding Commitment date
21	Harahan (Jefferson) 2	LA0043940	II / III-A	The proposed project is a phased approach to an underground asset management services program. Cleaning and video inspection will occur over a three year period with one third of the system being completed each year. Additionally, smoke testing, manhole inspection and GPS location of all assets will be performed. All data will be entered into an Underground Asset Management database, which will continue to track maintenance, identify defects and plan for the most appropriate issues that would need immediate attention.	\$ 4,000,000	0.95%	20							6/31/12
9	Haughton (Bossier) 2	LA0041386	II	Construct a new 0.5 MGD tertiary treatment plant. This will help ensure the facility meets the current permit requirements. All of the construction will be withing the existing treatment plant site.	\$ 3,000,000	0.95%	20							6/31/12
26	Hornbeck (Vernon) 2	N/A	Water Conservation	Installation of a Leak Detection System for the Potable Water Distribution System including meter reading software	\$ 395,000	0.00%	N/A	\$ 395,000		\$ 395,000	\$ 395,000	Water Efficiency	Categorical	6/31/12
22	Jefferson Parish (Jefferson) 2	LA004248, LA0068292, LA0100846, LA0042081, LA0042064, LA0066630	III-B , Energy Efficient	Replace pumping equipment at lift station with energy efficient pumps at five different wastewater treatment plants in the Parish. Additionally a new force main will be installed at the lift station.	\$ 15,250,000	0.95% on \$13.25M and 0.0% on \$2M	20	\$ 2,000,000			\$2,000,000	Energy Efficiency	Yes	6/31/12
2	Jonesboro (Jackson) 2	LA0046477	I IVA	A new Gate City area collection system will consist of a new collection system to serve an area currently using a very deteriorated collection system which has no centralized treatment facility. Additionally, there will be improvements to the North Oxidation Pond involving the following units / equipment - Levee; curtains; aerators; sludge removal; new outlet control structure; new chlorination; de-chlorination; flow measurement and fencing.	\$ 1,836,000	0.00%	N/A	\$ 1,836,000		\$ 1,836,000				6/31/12
8	Kenner (Jefferson) Phase II	LA0066800	I IVB	The City proposes to expand the Kenner Wastewater Treatment Plant by 3 MGD. The existing Canary Anasas lift station will be rehabilitated and upgraded, while the force main will be upgraded and extended. The two 8-inch Cattle Farm Road force mains will be replaced with one 12-inch force main. The Vintage and Medoc force mains are being replaced with one force main.	\$ 5,000,000	0.95%	20							6/31/12
27	Lake Providence (East Carroll) 2	N/A	Water Conservation	Installation of a Leak Detection System for the Potable Water Distribution System including meter reading software	\$ 950,000	0.00%	N/A	\$ 950,000		\$ 950,000	\$ 950,000	Water Efficiency	Categorical	6/31/12
3	Livonia (Pointe Coupee)	N/A	I II IVA	A new 125,000 GPD extended aeration wastewater treatment plant is proposed for this project. The project will also consist of 33,850 feet of 8" PVC gravity sewer, 133 concrete manhole, 3 pumping stations, 5,514 feet of PVC/HDPE force mains and 282 PVC service line cleanouts.	\$ 3,900,000	0.95%	20							6/31/12

Figure 1: List of Projects to be Funded, SFY2012								Additional Subsidy			Green Project Reserve			
Rank	Recipient	LPDES Permit number	Category	Project Description	Total Assistance	Interest Rate	Term	Principal Forgiveness Amount	Sustainability Policy	Disadvantaged Community	Amount	Category 2	Business Case Project?	Estimated Binding Commitment date
6	Logansport (De Soto)	LA0033308	I IIIA IIIB	The existing lift stations near the Town' s water treatment plant (Uncus Street) will be rehabilitated including replacement of existing pumps, piping, valves, electrical, controls & instrumentation and related items. The existing electrical services at the lift stations on Garrett Park and Robin Street will be upgraded and the existing electrical equipment and pumps/motors will be replaced. The sewer force main from the lift station at the Town's oxidation pond treatment plant will be replaced. Approximately 100 existing manholes will be replaced or rehabilitated and approximately 4,000 LF of gravity sewer main will be replaced or rehabilitated. Sludge and silt will be removed from the 3-cell oxidation pond. The sewer main from the Town's water treatment plant and the water plant lift station will also be replaced with a larger main.	\$ 1,135,000	0.95%	20							6/31/12
1	New Orleans Sewer & Water Board (Orleans)	LA0038091	I IIIB	Collection system repair and rehabilitation. Including Infiltration / Inflow correction.	\$ 9,000,000	0.95%	20							6/31/12
12	Ouachita Parish Sewer District # 5	LA0043982	IIIB	The proposed project consists of replacing approximately 7,000 linear feet of 18" ductile iron force main from a point south on the US Highway 80 / Downing Pines Road intersection to the KCS railroad with a 24" HDPE force main. The proposed project will follow the existing alignment of the existing force main.	\$ 1,918,000	0.95%	20							6/31/12
10	Plaquemine (Iberville) 1	LA0020648	I	The proposed project will include a new wastewater treatment plant (extended aeration treatment system located in a remote location). In addition to the new plant, the city would run an electrical line to the plant.	\$ 4,000,000	0.95%	20							6/31/12
25	Shreveport (Caddo) 2	LAD041394, LAD042188	III-A	This project provides physical inspections (smoke testing, survey, CCTV, dye testing, etc) that will be required to characterize the sewer system for a sanitary sewer rehabilitation and replacement plan.	\$ 5,000,000	0.95%	20							6/31/12
11	St. Bernard Parish Line Rehab	LA0040177	IIIA	The proposed project includes the lining of lift station wetwells throughout the entire collection system. This will include 92 lift stations. The wetwell lining serves as concrete restoration and minimizes inflow and infiltration into the wetwell.	\$ 4,000,000	0.95%	20							6/31/12
20	St. John the Baptist (Reserve/LaPlace)	LA0069868/LA006409 2	IIIB	The proposed project includes repairing and replacing gravity sewer lines and manholes in the Reserve and LaPlace areas. Reserve has approximately 577 manholes and 165,000 linear feet of sanitary sewer and LaPlace has approximately 1,936 manholes and 442,000 linear feet of sanitary sewer. Most of the lines are constructed of vitrified clay and suffer from excessive infiltration and inflow into the sewer system.	\$ 1,359,000	0.95%	20							6/31/12
7	Westwego (Jefferson)	LA0038059	II IIIA IIIB	Modification, repair and improvements to the wastewater treatment plant including headworks upgrade, aerator replacement, and main office building renovations.	\$ 1,150,000	0.95%	20							6/31/12
4	Winn Parish Police Jury	N/A	VII	The proposed project involves the construction of a 250'x150' parking area for the Winn Parish Courthouse Complex and the surrounding downtown area of Winnfield, LA. The parking lot will be constructed of permeable asphaltic surface treatment and a multiple layer aggregate base system. The design will provide sufficient infiltration capacity to eliminate the need for on-site retention and drainage systems. Additionally, the proposed project provides financing for a minor bio-retention area for excess overflow management.	\$ 275,000	0.00%	n/a	\$ 275,000			\$ 275,000	Green Infra-structure	Yes	6/31/12

Figure 1: List of Projects to be Funded, SFY2012								Additional Subsidy			Green Project Reserve			
Rank	Recipient	LPDES Permit number	Category	Project Description	Total Assistance	Interest Rate	Term	Principal Forgiveness Amount	Sustainability Policy	Disadvantaged Community	Amount	Category 2	Business Case Project?	Estimated Binding Commitment date
23	Winnfield (Winn) 2	LA0043915	I IIIB	The project will consist of upgrading all pumping stations within the City (13 pumping stations). Additionally, rehabilitation of the collection system will be included with this project. The work will eliminate sanitary sewer overflows.	\$ 1,500,000	0.95%	20							6/31/12
15	Zachary (East Baton Rouge)	LA0036439	I IIIA	The City of Zachary proposes to rehabilitate and replace sewer collection lines in the Cherry-Chestnut and Little Farms areas and Rollins Road as well. Additionally, the City proposes to rehabilitate and repair existing pump stations and gravity lines throughout the City and install emergency generators and a Supervisory Control and Data Acquisition (SCADA) system at each lift station. Rehabilitation of pump and collection lines is also proposed for the Oak Shadows subdivision.	\$ 9,300,000	0.95%	20							6/31/12
					\$ 122,391,200			\$ 5,742,500		\$ 3,467,500	\$3,620,000			

III. Short and Long Term Goals

LDEQ has developed short- and long-term goals for its CWSRF program. The short-term goals reflect goals for the SFY 2012.

Short-Term Goals

- **Goal:** *Provide \$3.4 million in principal forgiveness to communities that could not otherwise afford the project.*

Congress has directed that a percentage of the capitalization grant be allocated towards communities that could not otherwise afford the project. LDEQ must allocate between \$2,367,736 and \$6,309,387 towards these projects. The CWSRF is committed to providing principal forgiveness to at least 4 communities totaling \$3,467,500.

- **Goal:** *Fund green infrastructure, water and energy efficiency and environmentally innovative projects in an amount that is at least twenty percent of the capitalization grant.*

In FFY2011, Congress has directed that at least 20 percent of the capitalization grant be allocated towards “Green Project Reserve” projects and for FFY2012 at least 10% of the grant be allocated. LDEQ’s required minimum Green Project Reserve is at least \$4,800,300. LDEQ has identified four projects that qualify for 75% of the required green project reserve in the amount of \$3,620,000. LDEQ is currently reviewing projects on the project priority list to determine the final projects to be funded to meet this requirement. The CWSRF program will work with recipients to ensure that the required threshold is met. LDEQ will require and approve business cases for projects that have been determined to not categorically qualify for the Green Project Reserve. Business cases will be posted on LDEQ’s CWSRF website (www.deq.louisiana.gov/cwsrf) upon financing approval. The IUP will be amended when the remaining required projects have been identified.

- **Goal:** *Expedite project development and construction by encouraging recipients to begin construction within one year of placement in the Intended Use Plan.*

The LDEQ CWSRF program strives to reduce the time between project application and construction start-up to within one year of the capitalization grant award. The program will also aim to draw the federal capitalization grant funds as quickly as possible.

- **Goal:** *Revisit Standard Operating Procedures (SOPs) and update as applicable before June 30, 2012.*

The LDEQ CWSRF SOPs will be updated to reflect current operations. Updating the SOPs is a priority for CWSRF staff at LDEQ. The goal for the completion of the SOP updates is June 30, 2012.

- **Goal:** *Provide outreach to municipalities across the state of Louisiana.*

Communicate the availability of the CWSRF Program by the LDEQ personnel through outreach to individual municipalities across the state of Louisiana, and participation in

conferences or conventions, as well as promotion of the program via the LDEQ website. LDEQ personnel will present CWSRF program information, stressing nonpoint source pollution control and the protection of estuaries at a minimum of two (2) conferences and conventions during the year. The LDEQ will provide marketing materials such as brochures and promotional items. The CWSRF staff will be available to present information about the CWSRF program and obtain contacts for future meetings with potential borrowers. These conference events target local municipalities and local police juries with publically owned wastewater treatment facilities. Additionally, during these conferences and conventions, the CWSRF staff will interact with representatives of the municipalities to discuss their respective needs.

- **Goal:** *Participate in the Louisiana Waste Water Joint Funding Committee (LWWJFC).*
The mission of the LWWJFC is to assist applicants in securing funding for water and wastewater projects. It is a joint effort between the Louisiana Community Development Block Grants, US Department of Agriculture, Louisiana Department of Health and Hospitals (Drinking Water State Revolving Fund), and the LDEQ. The committee members will meet monthly throughout the year to review Intent-to-File applications and will review project information and determine which funding programs may provide assistance to the applicants.
- **Goal:** *Close at least 9 loans totaling more than \$52 Million.*
- **Goal:** *Apply for the FFY 2011 and FFY 2012 Capitalization Grants in SFY 2012.*
- **Goal:** *Issue a Revenue Bond to provide matching funds for Federal Capitalization Grants as necessary.*

Long-Term Goals

- **Goal:** *Provide low-cost financing for important water quality projects while maintaining the perpetuity of the CWSRF.*
LDEQ uses a cash flow model to guide decisions on funding levels, interest rates and other financing terms. LDEQ looks to balance the goals of maximizing subsidies while maintaining the fund in perpetuity.
- **Goal:** *Promote and advance wastewater treatment facility improvements in order to meet the requirements of the CWA through compliance assistance.*
Provide financial assistance to municipalities and other eligible recipients in pursuing statewide compliance with Federal and State water quality standards, assist borrowers in complying with the enforceable requirements of the CWA and to reach the goal of eliminating discharge of pollutants into the State's waters.

- **Goal:** *Expand CWSRF accessibility by creating financial assistance programs that address nonpoint source control and other nontraditional CWSRF projects.*

LDEQ has been successful in bringing important nonpoint source and other nontraditional CWSRF projects to the program. Many of these projects have special challenges in obtaining financing (outside of grants) due to a lack of user revenues. Financing options will be continually evaluated to help ensure that these projects can continue to come to the program for cost-effective financing.

IV. Allocation of Funds

Criteria and Method for Distribution of Funds

LDEQ's Project Priority Ranking System is attached in Attachment 1. All projects scheduled for funding with Louisiana's CWSRF have been reviewed for consistency with appropriate plans developed and approved under Section 205(j), 208, 212, 303(e), 319 and 320 of the of the Clean Water Act, as amended. Evidence of this review and finding of consistency is documented in each CWSRF project file.

The State's Project Priority List (Exhibit 1) consists of a listing of all projects that have, or are expected to qualify for, and participate in the CWSRF program. These projects are ranked by staff in the Business, Community Outreach and Incentives Division, given a priority rating, and then listed in alphabetical order on the current Project Priority List. Loans are approved from this list on a readiness to proceed basis. Should total actual project needs exceed CWSRF funds available, projects to be funded will be prioritized according to the Priority System. When needed, and with EPA approval, procedures will be established by the Department to sell bonds to expand the program to meet demand, or develop other procedures that are in the best interest of the Louisiana CWSRF program.

The ranking criteria emphasize high priority waterbodies, projects proactively addressing needs, and projects addressing enforcement and compliance issues. In addition, projects receive extra consideration for implementation of green infrastructure, energy efficiency, water efficiency and environmental innovation.

After projects are ranked according to the criteria, a Project Priority List is developed (Appendix A). Projects are further evaluated on their readiness to proceed to a financing agreement and construction; this is based on whether they have completed the environmental review and have obtained the necessary permits. Projects in disadvantaged communities may receive planning and design funding to assist them in planning their projects. Based on the amount available for financing, projects that are ready to proceed are placed on the IUP List of Projects to be Funded (Figure 1).

Bypass Procedures

LDEQ may bypass projects on the IUP List of Projects to be Funded if they are later determined to not be ready to proceed. In those events, other projects from the Project Priority List may move to the funding list. The LDEQ CWSRF also reserves the right to provide funding for only a portion of the total costs of a project or only a portion of the amount requested where the municipality can, based on its ability to pay, obtain other affordable financing for the remainder of the project. A project may be bypassed if a different project should be funded due to an emergency condition that can only be addressed in an immediate time frame. Bypassed projects that retain their priority rating will be subject to the same eligibility and funding considerations from future allotments as other fundable projects. All projects must be on the Project Priority List in order to receive funding. All bypasses will be explained in the Annual Report.

Types of Projects to be Funded and Financing Rates

Section 212 Projects

Projects identified in this IUP as qualifying for the CWSRF under the Clean Water Act section 212 will have an interest rate of 0.95 percent. If a project or project component qualifies for the Green Project Reserve or meets one or more of the elements in the Sustainability Policy, lower interest rates or additional subsidization in the form of principal forgiveness may apply. The financing term for most projects will be 20 years.

Nonpoint Source and Estuary Protection Projects

Nonpoint source activities (not specific projects) funded by the CWSRF must appear in Louisiana's Clean Water Act Section 319 Nonpoint Source Management Plan developed by the LDEQ in order to be financed. Estuary protection activities (not specific projects) funded with the CWSRF must appear in the Barataria-Terrebonne National Estuary Comprehensive Conservation and Management Plan developed by the Barataria-Terrebonne National Estuary Program, and be located in the estuary watershed, in order to be eligible for financing. Nonpoint Source (NPS) and estuary projects will receive an interest rate of 0.95 percent. If a project qualifies under the Green Project Reserve, a lower interest rate or additional subsidization in the form of principal forgiveness may apply. The financing term for most projects will be 20 years.

Green Project Reserve

Projects that qualify (in whole or in part) for the Green Project Reserve as Energy Efficiency, Water Efficiency, Green Infrastructure or Environmentally Innovative (as defined by U.S. EPA's 2012 CWSRF Procedures) a lower interest rate or additional subsidization in the form of principal forgiveness may apply. The financing term for most projects will be 20 years.

Disadvantaged Communities and Sustainability Policy

In its FFY2012 appropriations, Congress required states to provide additional subsidies. LDEQ is required to provide between \$1,504,246 and \$5,014,152 as additional subsidy in FFY2012. The additional subsidy will be provided as principal forgiveness. Congress also asked states to direct the subsidies to disadvantaged communities and sustainability projects, to the extent possible. LDEQ plans to direct its subsidies according to Congress' direction.

a. Disadvantaged Communities

All projects undergo a financial capability review. LDEQ collects substantial information from all project applicants, including audited financial reports, financial projections, outstanding debt, user rates, collection rates, tax information, and economic information such as unemployment rate and median household income.

Assistance recipients will be eligible for Disadvantaged Community financing if the median household income falls below the state average. These projects may receive 0 percent financing or additional subsidization in the form of principal forgiveness.

b. Sustainability Policy

LDEQ is committed to promoting sustainable design and management of wastewater utilities and clean water resources. EPA's Sustainability Policy has identified three categories of projects that help promote sustainable design and management of wastewater utilities. LDEQ is implementing this policy as outlined. The categories and types of eligible projects are described below.

Fix it first projects. The main principle is that projects in currently established areas, which are still suitable for use, should be encouraged over projects in undeveloped areas. The repair, replacement and upgrade of this infrastructure is encouraged. Projects that may qualify as fix it first projects include:

- Projects that are critical to assuring continued compliance with NPDES discharge limits in existing facilities.
- Upgrades to existing infrastructure in smart growth districts to spur development/redevelopment in these areas, rather than in unplanned or undeveloped areas.
- Rehabilitation of existing wastewater treatment systems (without expansion beyond a normal growth rate in the community or to service infill areas in the community).

Effective utility management. Plans, studies and projects that help improve the technical, managerial and financial capacity of assistance recipients to operate, maintain and replace their infrastructure. The principle is that improved stewardship of the existing infrastructure will help improve their sustainability and extend the useful life.

Planning. Preliminary planning, development of alternatives, and capital projects that reflect the full life cycle cost of infrastructure, conserve natural resources or use alternative approaches to integrate natural systems into the built environment.

Potential projects include:

- Projects that are identified through current facility planning (or similar efforts) as being critical to protecting long-term investments (federal, state and local) in LDEQ community wastewater treatment facilities.
- Projects consistent with local or regional land use plans.

V. Financial Management

Source of State Match

LDEQ's FFY2011 appropriation of \$16,233,000 and the FFY2012 appropriation of \$15,537,000 require state matching funds of \$6,357,340 (20 percent). LDEQ will be issuing \$3,250,000 in state match bonds in March 2012 to be put towards meeting state match requirements for FFY2011. The remaining state match requirement will be issued upon grant award of the FFY2012 appropriation. The state match bonds will be repaid using interest earnings on investments and assistance agreements.

Fee Income

Annually, the CWSRF assesses a 0.5% administrative fee to assistant recipients on all outstanding loan balances. Federal law allows the state to charge additional fees to supplement the 4% allowed from the fund itself to cover future excess administrative costs. In SFY2012, \$1,102,695 in fees are expected to be deposited into the Administrative fee fund. The Administrative Fees Fund is held outside the CWSRF.

Program Administration

Up to four percent (4%) of the capitalization grant can be used for administration of the fund by LDEQ. This is supplemented by a 0.5% administrative fee to assistant recipients on all outstanding loan balances. As of June 30, 2011, the LDEQ CWSRF has \$15,660,887 in banked administrative funds, to be used for administration of the program at a later date.

Anticipated Cash Draw Ratio

LDEQ uses the cash flow method for the CWSRF. In SFY2012, LDEQ will be using a cash draw ratio of 83.333 percent federal funds and 16.667 percent state match funds. State matching funds will be deposited to the CWSRF before or at the same time as capitalization grant funds.

Transfer of Funds from the Drinking Water State Revolving Fund

LDEQ reserves the authority to transfer additional funds as appropriate, at some time in the future, between the CWSRF and Drinking Water State Revolving Fund (DWSRF) program. Transfers eligible up to 33 percent of the FFY 2012 DWSRF capitalization grants are possible. LDEQ does not currently plan on transferring funds to or from the DWSRF in SFY2012.

Estimated Sources and Uses

The Sources and Uses table in Figure 2 identifies the sources and the uses all of the available funds in the CWSRF in SFY2012 as well as cumulatively. Sources of funds include federal capitalization grants and state matching funds, as well as bond proceeds and repayments. Investment earnings and administrative fees are sources of funds. In keeping with the objective of the CWSRF, the majority of the available funds are used to pay for water quality projects. Interest Earned are also used to pay for state match bonds.

Figure 2: Estimated SFY2012 and Cumulative Sources & Uses (*)	Cumulative Total through June 30, 2011	July 1, 2011- June 30, 2012 (2012 IUP)	Cumulative Total through June 30, 2012
SOURCES			
Federal Capitalization Grants	\$ 334,891,523	\$ 31,770,000	\$ 366,661,523
ARRA Capitalization Grants	43,081,400		43,081,400
State Match			
Appropriation/Agency Cash- Committed	26,753,586		26,753,586
Provided from State Match Bonds Issues	40,758,184	6,357,340	47,115,524
Principal Repayments on Assistance Provided	231,099,863	16,359,613	247,459,476
Interest Repayments on Assistance Provided	92,202,717	5,952,395	98,155,112
Investment Earnings	36,320,562	787,070	37,107,632
TOTAL SOURCES	\$ 805,107,835	\$ 61,226,418	\$ 866,334,253
USES			
Financing Agreements Entered (Base Program)	\$ 586,589,238		47,115,524
Interest Repayments converted to State Match	40,758,184	6,357,340	44,004,784
Projects on IUP (2012 IUP)		126,193,200	126,193,200
ARRA Financing Agreements Executed	43,081,400		43,081,400
ARRA Administrative Expenses	870,581	82,555	953,136
Administrative Expenses (Non-ARRA)	12,673,486	743,004	13,416,490
TOTAL USES	\$ 683,972,889	\$ 133,376,099	\$ 817,348,985

*LDEQ's sources exceeds its uses by \$48,985,268, LDEQ is working with several communities on our project priority list to determine with project will be funded with this excess sources.

Financial Management Strategies

Comprehensive financial planning is essential to LDEQ's CWSRF. Financial planning is used to determine appropriate interest rates, use of additional subsidies and annual and long term financing capacity. LDEQ is always striving to balance the need to provide as much low-cost financing as possible while ensuring that the fund can continue to operate in perpetuity. Each year, LDEQ obtains a cash flow model from a financial advisor which determines what its lending capacity is, considering different variables for interest rates, additional subsidization and potential for leveraging.

Additional financial planning materials, including the proposed payment schedule, the binding commitment schedule and financial projections can be found in Appendix B.

VI. Program Management

Assurances and Specific Proposals

The LDEQ has provided the necessary assurance and certifications as part of the Operating Agreement (OA) between LDEQ and US EPA. The OA describes the mutual obligations between EPA and LDEQ, and through a Memorandum of Understanding. The purpose of the OA is to provide a framework of procedures to be followed in the management and administration of the CWSRF. The OA was last updated in September 2004.

The OA addresses our commitment to key CWSRF requirements, including:

- 602(a) Environmental Reviews: The CWSRF will conduct environmental reviews according to the State Environmental Review Process developed for the SRF
- 603(b)(3) Binding Commitments: The CWSRF will enter into binding commitments for 120 percent of each quarterly grant payment within one year of receipt of the payment.
- 602(b)(4) Expeditious and Timely Expenditures: The CWSRF will expend all funds in the CWSRF in a timely manner.

Federal Requirements

Many federal requirements apply in an amount equal to the capitalization grant. These requirements are:

- Single Audit Act (OMB A-133)
- Disadvantaged Business Enterprise compliance (DBE)
- Federal environmental crosscutters
- Federal Funding Accountability and Transparency Act (FFATA) reporting

In order to minimize the burden on borrowers, the CWSRF program has selected two (2) projects in non-disadvantaged communities to comply with these requirements. The projects in Figure 3, total \$37,000,000, which is higher than the capitalization grants of \$31,770,000.

Figure 3: FFATA reporting projects

Recipient	Project Description	Financing Amount
Bossier Parish SD	There will be three collection system improvement contracts in the eastern part of Bossier Parish along the US Highway 80 corridor extending to LA 157, associated with Phase 1. The Phase 2 project consists of constructing a force main from the Phase 1 project to a new sewer treatment facility to be located on Red River and an associated collection system to provide services in central Bossier Parish.	\$17,750,000
Jefferson Parish	Replace pumping equipment at lift station with energy efficient pumps at five different wastewater treatment plants in the Parish. Additionally a new force main will be installed at the lift station.	\$15,250,000
Total		\$33,000,000

The assistance recipients identified will:

- Demonstrate compliance with the federal environmental crosscutting authorities during the environmental review and project planning stage.
- Follow the EPA Office of Small Business Programs guidelines for encouraging disadvantaged businesses to participate during the bidding process.
- Report on executive compensation as outlined in the Federal Funding Accountability and Transparency Act.
- Submit Single Audit reports in all years when disbursements of federal funds (both CWSRF and non-CWSRF federal funds) are greater than \$500,000.

These recipients have been informed of the requirements. LDEQ will be maintaining records of their compliance in the project files.

Davis-Bacon Wage Rates

EPA's FFY2012 Appropriations bill requires the application of Davis-Bacon prevailing wage rates to all treatment works projects funded in whole or in part by the CWSRF. The Davis-Bacon requirements do not apply to nonpoint source or decentralized wastewater treatment projects. Davis-Bacon applies to construction contracts over \$2,000 and their subcontractors (regardless of the subcontract amount). To ensure compliance with these requirements, DEQ will confirm that the correct wage determinations are being included in the bid specifications and/or construction contracts. DEQ will also provide assistance recipients with the specific EPA Davis-Bacon contract language that is to be included in bid specifications and/or contracts.

Audits and Reporting

The LDEQ CWSRF is committed to transparency and accountability. To that end, program information, Intended Use Plans, Annual Reports, and other program materials are posted on the SRF website: www.deq.louisiana.gov/cwsrf.

An independent audit is conducted annually by the Louisiana Legislative Auditor's office. Project milestones and information are reported through EPA's Clean Water Benefits Reporting database. The LDEQ CWSRF commits to entering benefits information on all projects into CBR by the end of the quarter in which the assistance agreement is signed.

VII. Public Review and Comment

On January 16, 2012, at 8 AM, a copy of the IUP was made available for public review and comment. A public meeting was held on Wednesday, January 25, 2012 to address any comments from the public. No comments were received. The review was advertised in the state journal and on the CWSRF website.

ATTACHMENT 1: Project Priority System

Attachment 1: LDEQ Clean Water State Revolving Fund Priority System

Clean Water State Revolving Fund Priority System

§2123. Introduction to the Clean Water State Revolving Fund Priority System

A. Introduction

1. On October 18, 1972, the Federal Water Pollution Control Act Amendments became Public Law 92-500. PL 92-500 was amended by PL 95-217, the Clean Water Act of 1977, PL 97-117, the Municipal Wastewater Treatment Construction Grant amendments of 1981, and most recently by PL 100-4, the Water Quality Act of 1987.

2. The primary aim of the Federal Act is to “restore and maintain the chemical, physical, and biological integrity of the nation's water.” The Federal Act emphasizes the national goal that, wherever possible, water quality is to be suitable for recreational contact and for protection and propagation of fish and wildlife. In addition, the Federal Act emphasized the special need for controlling or eliminating discharges of toxic pollutants, and that the goals of the Federal Act be met through the control of both point and nonpoint sources of pollution. A permit program has been established and geared to restricting pollutant discharges from point sources – that is, from factories, municipalities, and large agricultural operations where pollutants enter the nation's water through an outfall pipe, sewer, or other conduit. The permit program has been expanded to include pollutants entering the nation's water through nonpoint sources – that is, stormwater runoff from municipalities, factories, agricultural operations, and other sources that do not require NPDES permits.

3. The Water Quality Act of 1987 added Title VI to the Clean Water Act, which provides for a program of low interest loans. Section 603(c) of the Federal Act states that “The amounts of funds available to each State water pollution control revolving fund shall be used only for providing financial assistance (1) to any municipality, inter-municipal, interstate, or state agency for construction of publicly owned treatment works (as defined in Section 212 of this Act), (2) for the implementation of a management program established under section 319 of this Act, and (3) for development and implementation of a conservation and management plan under Section 320 of this Act.”

4. Section 603(g) of the Federal Act states that: “The State may provide financial assistance from its water pollution control revolving fund only with respect to a project for construction of a treatment works described in Subsection (c)(1) if such project is on the State's priority list under Section 216 of this Federal Act. Such assistance may be provided regardless of the rank of such project on such list.” Section 603(g) of the Federal Act does not require that projects for the implementation of a management program established under Section 319 of the Federal Act, and for development and implementation of a conservation and management plan under section 320 of the Federal Act must be on the State's priority list to receive financial assistance, however, such projects will be included on the priority list and assigned priority ratings in accordance with LAC 33:IX.2123.C.7.

5. Section 603(c) of the Federal Act states that: “After providing for public comment and review, each State shall annually prepare a plan identifying the intended uses of the amounts available to its water pollution control revolving fund.”

6. In implementing the requirements of the Federal Act, the department has derived the State of Louisiana CWSRF Priority System.

7. This system provides an orderly approach to preparing a priority list of publicly owned treatment works projects that meet the definition of section 212 of the Federal Act and provides for the selection of these and other eligible projects to be included on the Intended Use Plan (IUP) for each year.

B. List of Stream Subsegments and Subsegment Priority Numbers

1. The most effective use of water quality management assets in achieving state and national goals requires that management emphasis be directed at the most important problem areas first. The priority of management effort is intended to give more consideration to those areas where the most significant problems occur.

2. The state of Louisiana is divided into 12 water quality management basins which exhibit distinct hydrologic characteristics. Each designated basin is divided into stream segments and subsegments which exhibit common reactions to stresses, i.e., pollutants. The stream segmentation for Louisiana is contained in the state's areawide water quality management plans submitted under Section 208 of the Federal Act.

3. In order to provide the basis for directing the management effort for water quality, each stream subsegment is ranked according to its designated uses and the degree to which those designated uses are supported. The values from each of the category classifications, from Table B-1, are multiplied together to produce the stream subsegment priority number.

4. Information on designated uses and degree of support is taken from the latest approved Louisiana Water Quality Inventory: Integrated Report, which may be found on the department's website.

5. The stream priority list is used as the base for the later determination of the project priority ratings.

TABLE B-1
SUBSEGMENT PRIORITY RANKING MULTIPLIERS

Designated Uses	Multiplier
Shellfish Propagation	20
Sole Source Drinking Water Supply	15
Outstanding Natural Resource	10

Primary Contact Recreation	5
Secondary Contact Recreation	5
Fish and Wildlife Propagation	5
Agriculture	5
Degree of Support	Multiplier
Not Supported	5
Partially Supported	4
Fully Supported but Threatened	3
Fully Supported	2

Formula:

Designated Uses X Degree of Support = Stream Subsegment Priority Number

C. List by Priority Rank

1. In conjunction with the priority of the stream subsegments of the state of Louisiana, each municipality that has requested consideration for funding is rated as to its ability to comply with the Federal Act. This rating of municipalities forms an important water quality management tool.

2. The priority rating for each municipality considered is composed of two factors, the stream subsegment priority rating and the municipality factor. These two numbers are added together to form the basic project priority rating.

3. The municipality factor is the summation of two factors: the category factor and the pollution reduction factor. The category factor depends on the age of a particular treatment system within a project area. Depending on the type of the system whether it is a treatment or collection, the factor can be obtained from Tables C-1 or C-2.

Table C-1

Age of treatment plant Type of treatment plant	0 to 5 years	6 to 10 years	11 to 15 years	16 to 20 years	Over 20 years
Mechanical plant	2	4	6	8	10
Aerated lagoon	1	2	4	5	7
Stabilization pond	0	1	2	3	4
Other	0	0	1	1	2

Those projects with an existing collection system in need of rehabilitation or I/I correction will be awarded points from the Table C-2 based on the age of the collection system.

Table C-2

Age of collection system	Points
0 - 10 years	2
11 - 20 years	4
21 - 30 years	6
31 - 40 years	8
Over 40 years	10

The Category Factor is the higher of the two values from Tables C-1 and C-2 and will be used calculating the municipality factor. The Pollution Reduction Factor is an indication of the ability to reduce the pollution discharged into the receiving waters, and it obtained from Table C-3.

Table C-3

FUTURE LEVEL OF TREATMENT	SECONDARY	ADVANCED (BOD<20)	ADVANCED (20>BOD<10)	ADVANCED (BOD<10)
PRESENT TREATMENT LEVEL				
Raw (from existing outfall)	80	90	90	100
Less than Secondary	60	70	80	90
Secondary	20*	60	70	80
Advanced (BOD<20)	NA	20*	60	70
Advanced (20>BOD<10)	NA	NA	20*	60
Advanced (BOD<10)	NA	NA	NA	20*
Unsewered (no outfall)	30	40	50	60

N/A - Rehabilitation and/or I/I correction only	40
N/A- No reduction in pollution discharge anticipated	20

* If no change to treatment but increase capacity, change 20 to 40

Formula:

$$\text{Category Factor} + \text{Pollution Reduction Factor} = \text{Municipality Factor}$$

4. A separate municipality factor shall be determined for each treatment facility and the collection system within its service area. When two or more treatment facilities will be included in a single project, regardless of whether they are in the same or different municipalities, the municipality factor for the project will be the weighted average, weighted on population served, of the municipality factors for all treatment facilities included in the project. For wastewater projects: Basic Project Priority Rating = Stream Subsegment Priority Rating + Municipality Factor.

5. The priority rating for a municipality may be re-evaluated and adjusted whenever new information is made available. Such information may result from facilities planning, water quality analysis, etc.

6. Any municipality may request a reevaluation of its priority rating. Any such requests should include the reasons that the municipality believes the priority rating to be in error.

7. Projects for the implementation of a management program established under Section 319 of the Federal Act, and for development and implementation of a conservation and management plan under Section 320 of the Federal Act will be assigned a Stream Subsegment Priority Number based on the stream subsegment that will be most impacted by the project. These projects will also be assigned an additional factor based on the ability of the project to reduce pollution in receiving waters. Since such projects may take numerous forms, this factor will be assigned by the department based on evaluation of individual project applications and will not exceed 100 points. The Basic Priority Rating for projects under sections 319 and 320 of the Federal Act are as follows:

$$\text{Basic Project Priority Rating} = \text{Stream Subsegment Priority Rating} + \text{Additional Assigned Factor.}$$

D. CWSRF Priority List

1. Upon receipt of a request by the authorized representative of a municipality or an applicant, the basic priority rating will be determined and the proposed project will be placed on the CWSRF Priority List.

2. Request for inclusion on the CWSRF Priority List must include the following:

- a. for public entities, a resolution from the governing authority designating a project representative and authorizing him/her to submit pre-application materials;
- b. a completed Form RF-100; and
- c. a map of the proposed planning area.

3. It is the responsibility of each authorized project representative to maintain current and accurate information for his/her project, and to submit any revised or updated project information to the department each year which will be used to prepare the CWSRF Priority List.

4. The loan amount shown on the list will be the estimated amount of those items that are eligible for loan assistance. Eligibility of specific items will be based on the latest federal requirements in effect at the time the list is prepared. Should these requirements be changed subsequent to preparation of the list, all projects on the list will be adjusted accordingly. The monetary amount of each item will be based on the latest information supplied by the authorized project representative in accordance with Paragraph 2 of this Section.

5. Projects normally proceed in three steps: Facility Planning, Design, and Construction.

It is intended that projects that have completed Facility Planning and Design and are ready to begin construction will be considered for funding before projects that are not ready to begin construction. Projects will be awarded points in addition to the basic priority rating based on the readiness to proceed to construction in accordance with the following milestone:

Milestone	Points
Project has completed Facility Planning and planning documents have been approved	1000
Project has completed design and plans and specifications have been approved	2000

6. Large projects may be offered assistance in several phases based on a request by the authorized project representative, on a comparison of project cost and funds available, or on other factors that may require delayed funding for portions of a project. Each phase of a project will be listed separately on the CWSRF Priority List. All phases will have the same basic priority rating but each phase will have its own points awarded based on readiness to proceed.

7. The CWSRF Priority List will include all projects that have requested funding assistance, ranked in priority order, regardless of the amount of funds available. The priority list will be used for the later preparation of the CWSRF IUP.

8. The CWSRF Priority List will be made available for review each year, not less than 30 days prior to submission to the EPA. Each municipality that has submitted pre-

application materials will be notified by letter of the availability of the CWSRF Priority List. It is the responsibility of each potential borrower to examine all the information listed for his/her project for accuracy. Any errors or omissions should be reported to the department prior to the deadline for comments.

9. Any project or project phase will be removed from the CWSRF Priority List once funding for the project or project phase has been provided through the CWSRF; or when the project or project phase has been constructed using another source of funds.

10. Any project that has had no written communication with the department for a period of five years and has presented no other evidence of progress toward completion of items that are prerequisites to funding during the five year period shall be deemed to be an inactive project and may be removed from the CWSRF Priority List. Prior to removal of an inactive project from the CWSRF Priority List the department will contact the project representative in writing to inform them of the impending removal of the project.

E. Intended Use Plan

1. An IUP is prepared for each state fiscal year and details the intended uses of amounts expected to be available to the CWSRF during the year. These intended uses will include loans for projects as well as other allowable uses of the Fund, including but not limited to repayment of bonds issued by the Fund, loan guarantees or insurance for local obligations, and payment of allowable costs of administering the Fund.

2. On July 1 of each year, the Administrative Authority or his designated representative will determine the amount expected to be available for loans for projects for the current state fiscal year.

3. Of the amount expected to be available in accordance with Paragraph 2 of this Section, certain amounts will be reserved in accordance with Section F.

4. Projects must be included on the current CWSRF Priority List that has met public participation requirements and has been submitted to the EPA in order to be selected for the IUP. Projects on the proposed CWSRF Priority List may be selected for the proposed IUP provided that both the proposed Priority List and IUP meet public participation requirements and are accepted by the EPA.

5. Projects on the CWSRF Priority List will be selected to receive funds from the amount expected to be available in accordance with Paragraph 2 of this Section, less any reserves established in accordance with Section F, by considering projects in several categories for funding. All projects in a high priority category will be funded before any projects in a lower priority category are funded. Within each category projects will be considered for funding in order of the priority ranking of the individual project. The several categories that are considered are as follows:

- a. Projects that meet specific requirements of federal law. Where federal law requires that a percentage of capitalization grant funds must be used to fund certain categories of projects, projects meeting those requirements will be funded ahead of other projects until the required percentage of funds has been satisfied.

- b. Projects which are required for completion of an ongoing project for which at least one phase has already received funding through the CWSRF program, and that will not result in an operable treatment system without the additional funds. To qualify as an ongoing project, the work for which additional funds are required must be specifically identified within the scope of work for the project for which a Facilities Plan has been approved by the department.
- c. All other projects that do not meet either of the above conditions.

6. Notwithstanding the provisions of paragraph 5 above, no project on the CWSRF Priority List will be placed on the IUP unless the municipality has submitted a Letter of Intent to the department stating the Municipality's intention to proceed with the project, and a project schedule that indicates that the Municipality will have completed all prerequisite program requirements and will be able to receive a loan during the fiscal year.

7. The CWSRF IUP is divided into two portions: a. the fundable portion and b. the planning portion. The fundable portion includes those projects expected to be awarded assistance during the fiscal year for which the list was prepared. The planning portion includes those project steps expected to receive funding during the next four fiscal years after the fiscal year of the list, based on the best available information on funds expected to be available.

8. The CWSRF IUP will be made available for inspection at the same time as the CWSRF Priority List each year, but not less than 30 days prior to submission to the EPA. Each municipality or applicant that has submitted pre-application materials will be notified by letter of the availability of the IUP. It is the responsibility of each potential borrower to examine all the information listed for his/her project for accuracy. Any errors or omissions should be reported to the department prior to the deadline for comments. Applications for assistance which deviate substantially from the proposed project amount contained in the IUP might not be processed.

9. A project may be moved from the fundable portion of the list to the planning portion (bypassed) if it is determined that the project will not be ready to proceed during the funding year. Department staff will contact the project representative in writing to advise them of the impending bypass of the project and afford them an opportunity to present updated information that might avoid a bypass.

10. If cash flow of the program permits, either through project bypasses or the availability of additional federal capitalization funds, or if for any other reason it is determined by the department that additional funds are available for projects, projects from the planning portion of the list which are ready for funding and which have completed the priority list public participation requirements will be advanced to the fundable portion of the list. Individual projects will be advanced, in accordance with provisions of Paragraph 5 of this Section, until the available federal funding is consumed.

11. If insufficient projects meeting the criteria of Paragraph 6 of Section D for advancement from the planning to the fundable portion of the list are available to consume the additional funds, the department may prepare a revised list containing projects which have not met public hearing requirements; however, such projects will not be funded until public hearing requirements have been met.

12. If the actual amount available during the year is less than the projected amount expected to be available in accordance with Paragraph 2 above, and it is not possible to fund all projects on the fundable portion of the IUP, then, of the projects not yet funded, those projects selected last for inclusion on the IUP will be moved from the fundable portion to the planning portion until the remaining projects can be funded with the available funds.

13. If any project requests more funds than the amount listed on the IUP for that project, and granting the additional funds would result in insufficient funds for the remaining projects on the fundable portion, the additional funds will not be granted; but the project may request the additional funds be added to the fundable portion for the next fiscal year.

14. The CWSRF IUP will be submitted to the EPA for their review and acceptance as soon as possible after the public comment period has expired.

F. Reserves Related to the IUP

1. Reserves for State Management Assistance

- a. The state may set aside a portion of the total funds available during the IUP year for use by the department in fulfilling its obligations to manage the CWSRF Program.
- b. This reserve will be limited to the amount authorized by federal law as a percentage of each federal capitalization grant.

2. Reserve for loans for Facilities Planning and Design

- a. The state may set aside a portion of the total funds available during the IUP year for loans to municipalities for Facilities Planning and Design.
- b. This reserve is limited to municipalities that meet all of the following conditions:
 - i. The construction portion of the project must appear within the five year planning portion of the IUP.
 - ii. The loan is to perform facility planning or design work that has not been previously funded.
 - iii. The applicant does not have the financial capability to complete facility planning and design work without financial assistance.
- c. This reserve will be implemented only to the extent that the state deems necessary to provide assistance to municipalities that would be unable to complete Facilities Planning and Design work without assistance and that are expected to receive assistance for construction when Facility Planning and Design work are completed. This reserve may not exceed ten percent of the funds available in accordance with Paragraph 2 of Section E.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:2011(D)(1).

ATTACHMENT 2: Public Notice

PUBLIC NOTICE

Notice is hereby given that the Louisiana Department of Environmental Quality (LDEQ) Clean Water State Revolving Fund (CWSRF) is holding a public hearing to present the draft Intended Use Plan including the Project Priority List on Wednesday, January 25, 2012, at 10:00 a.m. in Room 1019 of the Galvez Building, 602 North 5th Street, Baton Rouge, LA 70804. The Project Priority List is part of the Intended Use Plan for projects to receive funding through the CWSRF for Fiscal Year 2012.

Copies of the draft Intended Use Plan and Project Priority List are available for inspection during office hours (8a.m. - 4:30p.m. Monday-Friday) at the LDEQ, 602 North 5th Street, Baton Rouge, LA, online at www.deq.louisiana.gov/cwsrf by clicking on Intended Use Plan, or by contacting the LDEQ at cwsrf@la.gov. Interested parties may review the Project Priority List prepared as part of the grant applications and may make comments at the public hearing or may submit written comments to Jonathan McFarland, LDEQ-CWSRF, P.O. Box 4301, Baton Rouge, LA 70821-4301 or by email at cwsrf@la.gov. Written comments must be received by Wednesday, January 25, 2012 at 3:00 pm.
